

Johns Hopkins University Postdoctoral position in cell and extracellular matrix biology

NIH-funded postdoctoral position is available immediately in the laboratory of Dr. Shukti Chakravarti, Department of Medicine, Cell Biology and Ophthalmology, to investigate interactions of lumican, and other extracellular matrix (ECM) proteins with toll-like receptors and integrins in phagocytosis, monocyte and neutrophil migration. Our goals are to gain molecular insights in ECM mediated regulation of immune inflammatory and autoimmune responses. The candidate must be highly motivated, within 2 years of completion of a PhD in the areas of cell biology, immunology or biochemistry.

To apply please submit a brief statement of past research accomplishments and future goals along with your CV and names of two references to Professor Shukti Chakravarti, schakra1@jhmi.edu
