

**Head of Cellular and Molecular Therapies Laboratory
Leeds**

Reference: 918-PD4329

£54,998 - £67,805 per annum

Closing Date: 1st October 2014

Our work in Cellular and Molecular Therapies (CMT) is central to the provision and improvement of haemopoietic stem cell transplantation. This work enables us to support approximately half of transplants carried out in England each year through a network of GMP grade laboratories. We also carry out translational research and development activities with academic and commercial partners to ensure we are at the forefront of improvements to transplantation and related fields. Our expertise in GMP, quality and regulatory matters ensures that we always maintain the highest standards in the first class service we offer.

We have a vacancy for Head of Laboratory in Leeds. This prestigious role offers you the chance to lead a modern cell therapy laboratory, taking responsibility for the relevant scientific, technical and clerical staff. You will also take an active role in developing related new cell therapies to ensure the service stays at the cutting edge of patient-focused care.

To qualify, you will need to be an HCPC registered Clinical Scientist or actively working towards this and have significant relevant experience in stem cell and related cell processing and testing. Your technical credentials will be complemented by excellent communication, training and leadership skills.
