

## **Post-doctoral Position Available**

A full-time postdoctoral fellowship position is currently available in the lab, located in the Terry Fox Laboratory at the BC Cancer Research Centre at 675 West 10th Avenue, Vancouver. Utilizing molecular biology, cell culture, and animal modeling techniques, the successful applicant will investigate molecular properties of leukemic stem cells and develop new therapeutic approaches to target these critical cells.

Applicants should have a recent PhD with a strong background in molecular and cellular biology. Prior experience in cancer biology and/or leukemia models is desirable, and experience with purification of cancer stem cells from patient samples and animal models would be an asset. This position will remain open until filled. Please submit a letter of interest with CV by email to [xjiang@bccrc.ca](mailto:xjiang@bccrc.ca).
