

Are you someone who really wants to make a difference in the world?

Join our passionate team and spend your day helping people  
change their lives and achieve their dreams!

California Cryobank ([www.cryobank.com](http://www.cryobank.com)), one of the largest and most respected reproductive tissue banks in the industry, provides anonymous donor semen services as well as private storage of semen, eggs and embryos to thousands of people around the world each year.

Our subsidiary division, FamilyCord ([www.familycord.com](http://www.familycord.com)) is a top-tier umbilical cord blood processing and storage company recognized as a leader and innovator within the rapidly growing cord blood banking industry.

California Cryobank is privately-held, with headquarters in West Los Angeles and branches in Westwood, Palo Alto, Boston and New York City. We have built a reputation of quality and caring for over 37 years and are poised for continued growth and success.

We have an immediate opening for a full time Clinical Laboratory Scientist (CLS) to support the exciting and cutting-edge cell engineering and manufacturing work being done in our Stem Cell Division!

Essential Duties and Responsibilities include the following:

- Adheres to good manufacturing practices (GMP) guidelines.
- Operates in a regulated, clean room environment.
- Understands and performs all work using good aseptic technique.
- Performs essential laboratory responsibilities for processing/freezing cell products and tissue according to established procedures.
- Performs colony assay procedures, cell counts, viabilities and sterility testing.
- Performs immunophenotyping of cells by flow cytometry.
- Maintains frozen inventory and prepares/ships frozen cell units for transplant or transfer.
- Assists in the care, maintenance and quality control of equipment and supplies.
- Maintains accurate department records, reports and statistical data as required.
- Assists with staff training and competency.
- Performs all associated quality control, quality assurance and variance procedures.
- Participates in process improvement and assists in developing new lab procedures.
- Follows Safety policies and reports accidents and violations according to procedures.
- Comprehends and follows applicable FDA regulations and AABB standards for cell and tissue manufacturing.
- Other duties and projects as required.

Requirements:

- Bachelor's degree (in science or medical related field)
- Successful completion of an accredited medical technology training program.
- Current California Clinical Laboratory Scientist license.
- Minimum 3-5 years' cell therapy related experience, to include stem cell processing and/or microbiology, blood banking, bone marrow transplant, or flow cytometry.
- Knowledge/training in liquid nitrogen handling.
- Ability to perform algebraic calculations to determine concentrations, ratios, percentiles and statistical knowledge to include mean, median, standard deviation and variations.
- Good working knowledge of MS Outlook, Word and Excel.

We offer competitive compensation and benefits, inc.:

- Group health, dental and vision insurance
- Company-paid life and disability insurance
- Discretionary annual bonus
- Generous Paid Time Off (PTO) policy - 17 days to start!
- Paid holidays
- 401k Plan, including Company Match
- Paid bereavement leave
- Health Care and Dependent Care Flexible Spending Accounts
- Public transportation/vanpool reimbursement (up to \$150 per month)
- Employee Assistance Program
- Travel Assistance Program
- Employee discount on cord blood banking with FamilyCord
- Fun employee events!
- Discount tickets (movies, theme parks, etc.)
- Flexible schedules (varies by department)

Please submit your cover letter with salary requirements and resume.
