

## **Postdoctoral fellow opportunity at St Louis Hospital (INSERM) in Paris (France)**

Our Lab is seeking a postdoctoral fellow with experience in stem cells biology to work on an innovative project for regenerative medicine. The research will involve signaling mechanisms underlying cell reprogramming and/or lineage conversion to enhance regeneration and stem cell-based regenerative medicine.

This postdoctoral position is funded by ANR (“Agence Nationale pour la Recherche”) for at least two years.

The successful candidate will have unique exposure to various aspects of stem cell biology and cell plasticity and gain highly desirable experience.

### **Requirements**

---

A recent PhD is preferred. We are looking for highly motivated candidates with ability to work in an independent fashion. He/she should have a strong experimental background in molecular and cellular biology. Experience with mammalian cell culture is strongly preferred. Fluent english is necessary to interact with foreign fellows (PhD and postdoc) of the lab.

For further information, please send a cover letter, your CV and the names of 2 or 3 references to:
