

# Imperial College London

Department of Surgery & Cancer  
Division of Cancer

**Research Associate**  
**Salary Range £33,860 - £42,830 per annum**

We are seeking a highly motivated Research Associate to join a Molecular Cell Biology Group whose focus of research is Prostate Cancer. The successful candidate will study the effects of epigenetic changes on the expression and function of secreted signalling proteins that affect prostate cancer cell proliferation, migration and invasion.

The post holder will have a PhD or equivalent qualification in cancer biology, biochemistry, cancer genomics, bioinformatics or a related subject, or acquired equivalent research, industrial or commercial experience. In addition, the successful candidate will have proven expertise in cell culture, molecular cell biology and other techniques applicable to the project and be computer literate with a good knowledge of different computer programs and experience in data presentation and statistical analysis.

This post is full time, for a fixed-term of 12 months in the first instance and available immediately. The post is based at the Hammersmith Hospital campus in East Acton.

For informal enquiries please contact Dr Robert Kypta ([r.kypta@imperial.ac.uk](mailto:r.kypta@imperial.ac.uk)).

Further information regarding Dr Kypta's research interests may be located: <http://www.imperial.ac.uk/people/r.kypta>.

Our preferred method of application is online via our website <http://www.imperial.ac.uk/job-applicants/>. Please complete and upload an application form as directed.

**Reference number: SM183-15HP**  
**Closing date: 25 August 2015**
