

A post-doctoral research fellowship is available at the Centre for Regenerative Medicine and Nanotechnology at University College London (UCL). Founded in 1826, UCL is placed joint fifth (with Oxford University) in the QS World University Rankings 2014/15 and is one of the world's leading universities focused on research excellence and teaching.

The position is based in the laboratory of Dr. Ashleigh Boyd, and the laboratory is focused on the application of stem cell biology to the study of immunological disease and cancer. This project is based on developing new stem cell based *in vitro* and *in vivo* models to study the development and pathogenesis of pancreatic cancer.

To make an application please send a CV and contact details, including email addresses for three referees, to: a.boyd@ucl.ac.uk. Please include a covering letter indicating why you believe you are suitable for the position, your long-term research and professional goals, and any particular expertise you have that you feel may be applicable in this work. In short-listing candidates, preference will be given to candidates who have experience in pluripotent stem cell biology techniques (e.g ES and iPS cell culture) and graduate/other research experience in cell and molecular biology.
