

We are seeking a postdoctoral fellow in translational research in the laboratory of Dr. Beata Kosmider at Temple University in Philadelphia, PA. The goal of the study is to explore the mechanisms involved in oxidative lung injury induced by environmental factors. Applicants should hold a recent Ph.D. degree and have a background in redox biology, biochemistry or molecular biology.

The successful candidate will develop and execute experimental procedures, interpret experiments, present results at scientific conferences and prepare manuscripts for publication. The candidate will have the ability to work both independently and as part of a team. To apply, please email your CV along with the contact information of three references to Dr. Beata Kosmider.
