

## **National Field Product Specialist (Clinical Research Procedural Support)**

**COOK MYOSITE INCORPORATED**, a division of Cook Incorporated, is a growing, forward-thinking biotechnology organization seeking a full time Field Product Specialist to join our team. The Field Product Specialist will support research products and clinical procedures through direct physician and site interaction, education, and procedural observation. The FPS position entails traveling to clinical sites for procedural support, helping each clinical site with patient recruitment needs, building relationships with both clinical and non-clinical decision makers, and providing feedback on procedural interactions to many internal groups.

### **Essential Job Functions/Duties**

- The candidate will support muscle biopsy procedures and injection procedures at domestic and international clinical sites.
- Must be the technical expert on the product, procedures, clinical trials, and MyoSite processes.
- Understand the regulations and rules associated with clinical trials.
- Ability to troubleshoot and remain calm during fast paced situations.
- Create summaries of clinical findings during procedure observations.
- Identify, establish, support, and develop relationships with key clinical and non-clinical decision-makers at clinical sites.
- Provide procedural feedback to Product Development, Product Management, Product Logistics, and other internal groups.
- Support new product launches; including but not limited to assistance with creation of training materials/programs, presentations, and ongoing clinical field support.
- Support clinical evaluations and trials.
- Perform field market analyses and help identify future trial site opportunities.
- Maintain frequent communication with Manager, Team Lead, Product Logistics, CRI, and other support functions.
- Excellent problem solving skills and ability to work in collaborative and independent work situations and environments with minimal supervision.
- Maintain accurate and timely reports and records.
- Must work and interact effectively and professionally with and for others throughout various levels of the global organization to achieve company goals.
- Must strictly adhere to safety requirements.
- Maintain regular and punctual attendance.
- Must maintain company quality and quantity standards.
- Must have effective oral and written communications throughout various levels of the global.

**This position is a national position (preferably located in the west/central portion of the U.S.).**

### **Minimum Work Experience/Educational Requirements**

- Requires Bachelor's degree in Science or Biotechnology with 2 years of experience providing procedural support in hospitals or clinic settings.
- Must be able to travel internationally and domestically up to 75% of time.
- 3 years exp as a Field Product Specialist or 3 years of exp in a clinical research preferred.
- The candidate has an understanding of the regulations and rules associated with cGCP and cGMP.
- Microsoft Office proficiency and excellent organizational skills required.
- Maintain accurate and timely reports and records.
- Excellent problem solving skills with effective oral and written communication skills.

Cook MyoSite offers a handsome benefits package which includes Competitive Salary, Health/Dental/Vision Coverage, Company Paid Life Insurance, Company Paid Short Term Disability, Paid Time Off upon hire, Paid Holidays upon hire, 401(k) Eligibility upon hire, Profit Sharing, Company Incentive Bonuses, and an Educational Assistance Program.

**Please note that resumes sent without a cover letter will not be considered.**
