

Normal and Malignant Hematopoiesis - Assistant, Associate or Full Professors: Cincinnati, OH, United States

The Stem Cell/Hematopoiesis & Hematologic Malignancies Programs and Oncology Division of the Cancer and Blood Disease Institute at Cincinnati Children's Hospital Medical Center invite applications for tenure-track faculty positions at the rank of Assistant, Associate, or Full Professor. The mission of these inter-related programs is to pursue multi-disciplinary, synergistic, and highly collaborative research dedicated to normal and malignant hematopoiesis. The programs are built upon a foundation of extraordinary institutional strengths in basic and translational clinical research at Cincinnati Children's Hospital and at the University of Cincinnati College of Medicine. We seek candidates with innovative approaches and novel paradigms to study the basic biology, modeling and translational aspects of stem cell biology, benign hematopoiesis, and malignancies including Leukemia/Lymphoma, Myelodysplastic Syndromes, and Myeloid neoplasms as well as premalignant conditions/clonal hematopoiesis and marrow failure syndromes.

More information about the Cancer and Blood Disease Institute can be found at <https://www.cincinnatichildrens.org/service/c/cancer-blood/research>

Cincinnati Children's Hospital Medical Center is ranked as one of the nation's top 3 children's hospitals, and one of the nation's largest translational research centers for new anticancer drug development, immune therapies, and stem cell transplant. It is a premier research institution with over 900 diverse and productive faculty members. Here, researchers work collaboratively across specialties and divisions to address some of the biggest challenges we face today in improving health. A strong network of research support services and facilities, along with institutional commitment to research, push our team of faculty, postdocs and support staff to explore the boundaries of what is possible, leading to significant breakthroughs. We are driven by our mission to improve health and transform the delivery of care through fully integrated, globally recognized research, education and innovation.
