## Postdoctoral Fellow (Liver Tissue Engineering)

Center for Engineering in Medicine  
Massachusetts General Hospital and Harvard Medical School

### Job Description

We are seeking highly motivated, independent-minded postdoctoral fellows to drive innovative research projects forward in the area of tissue and organ engineering. The candidates must be productive and eager to learn, scientifically curious, intellectually committed and capable of working independently. Strong communication and writing skills are essential.

We encourage strong applicants (MD, PhD or MD/PhD) to submit a pdf package containing a cover letter, and extended CV, and a list of three references with complete addresses to [ireis1@sbi.org](mailto:ireis1@sbi.org) with "Harvey Fellowship" in the subject field.

First year salary range is \$48,000-\$58,000, depending on experience. A materials and travel budget of \$12,000/year is also provided. Candidates can apply anytime during the year

### Application package

We encourage strong applicants (MD, PhD or MD/PhD) to submit a pdf package containing a cover letter, and extended CV, and a list of three references with complete addresses to [buygun@mgh.harvard.edu](mailto:buygun@mgh.harvard.edu).

### Company Description

Center for Engineering in Medicine (located in Shriners Hospital) is affiliated with Massachusetts General Hospital & Harvard Medical school and houses 6 senior and ~10 junior PIs along with a research staff >50. The research in the hospital is funded by NIH, NSF, DOD, Shriners, MGH as well as industry.
