**Postdoctoral Position
Pain in Mouse Models of Spinal Cord Injury**

Stark Neurosciences Research Institute (SNRI), Indianapolis
Spinal Cord and Brain Injury Research Center
Indiana University, School of Medicine, Indianapolis.

A postdoctoral position is available in the laboratory of Dr. Armin Blesch in the Department of Neurological Surgery (<https://snri.medicine.iu.edu/people/primary-investigators/armin-blesch-ph-d/>) to study the role of neuronal plasticity and activity in the development and maintenance of central neuropathic pain in mouse models of spinal cord injury.

Candidates who just finished their degree in neuroscience or related field, or already have postdoctoral experience are welcome to apply. Successful candidates should be able to perform self-directed work, possess excellent collaborative skills and demonstrated experience in oral and written communication. Expertise in animal models of spinal cord injury, mechanisms of pain, or transgenic mouse models would be advantageous.

Compensation is dependent upon qualifications. Candidates are expected to start mid 2018. Review of applicants will continue until positions are filled.

Applicants should submit a cover letter, complete curriculum vitae including previous research experience and list of publications and addresses of three references in a single PDF document to:

Armin Blesch, Ph.D.
