

Postdoctoral Fellowship positions in Leukemic & Normal Stem Cell Biology

NIH-supported postdoctoral fellowship positions are available immediately in the laboratory of Dr. Reuben Kapur in the Hematologic Malignancies and Stem Cell Biology Research Group within the Wells Center for Pediatric Research at the Indiana University School of Medicine. The postdoctoral fellows (US Citizens or green card holders) will be working on projects related to study of genetic and epigenetic regulation in normal and leukemic hematopoietic stem cells. Dr. Kapur's laboratory environment uses pharmacologic, genetic and biochemical approaches, including established, as well as newly created, mouse models and patient derived cells to study normal and leukemic biology. **For recent publications, please refer to *Palam et al., Journal of Clinical Investigation Insight, Feb, 2018; Hu et al, Nature Communication, Aug, 2018 and Cai et al., Cell Stem Cell, Dec, 2018.***

A PhD in Molecular Biology, Biochemistry, Pharmacology, or life sciences is required. Experience with rodents, cell/tissue culture, molecular biology, epigenetics and hematopoietic stem cell biology are preferred. Salary is commensurate with skills, level of experience and follows the NIH pay scale. Information on University benefits programs, including eligibility, is located at postdoc.medicine.iu.edu.

To apply for these positions, please electronically send a letter of application describing your interest and include your CV along with the contact information for three professional references to rkapur@iupui.edu.

Indiana University is an Affirmative Action/Equal Opportunity Employer. The university is committed to diversity and welcomes applications from all qualified individuals, including minorities, females, individuals with disabilities, and veterans.
