

POSTDOCTORAL FELLOWSHIP

Stem Cell Metabolism and Type 2 Diabetes Risk Joslin Diabetes Center/Harvard Medical School

A postdoctoral position is available immediately to join our exciting project focused on the study of the impact of diabetes risk on human induced pluripotent stem cell (iPSC) metabolism, transcriptional regulation, and epigenetics. Support facilities and research environment at Joslin Diabetes Center and Harvard Longwood area are outstanding. Applicants should have experience in analysis of cellular metabolism and mitochondrial biology, preferably with experience with culturing and phenotyping iPS cells.
