

MILLER
SCHOOL OF MEDICINE

Postdoctoral Associate - Mammary Stem Cell and Cancer Biology

We are seeking a highly qualified and motivated candidate to work on an NIH-funded project to study novel WNT/TGFbeta transcriptional mechanisms in adult stem cell activation and breast cancer.

Candidates with a recent Ph.D. degree in Biochemistry or the Life Sciences and significant research experience in mammary gland biology,, epigenetics, stem cell analyses, and state-of the art DEEP Sequencing techniques (ChIP-Seq; RNA-Seq), and/or protein-protein interaction studies are especially encouraged to apply.

Applicants should send by e-mail a cover letter, curriculum vitae, summary of research experience, along with names and contact information of three references to:

Dr. Karoline Briegel
Department of Surgery
Braman Family Breast Cancer Institute
Sylvester Comprehensive Cancer Center
University of Miami Miller School of Medicine
Miami, Florida 33136
e-mail: kbriegel@med.miami.edu

The University of Miami offers state-of-the art research facilities, including an Interdisciplinary Stem Cell Institute and a Human Genomics Institute for NGS. The University of Miami is an equal opportunity/affirmative action employer. Miami is a major cosmopolitan city in South Florida with many cultural attractions and good weather all year around.
