

Postdoctoral candidates are sought to work in one of the following areas: biomarker detection, cancer therapy, stem cell biology, nanomedicine, and regenerative medicine at the University of Oklahoma. Our group has established expertise in phage display, nanotechnology, stem cell differentiation, nanomedicine and biomaterials. The successful candidates will have an opportunity to work at the interface of nanotechnology, biomaterials, biology, and medicine. The ideal candidates are expected to have a PhD degree in the areas of analytical chemistry, bioanalytical chemistry, biochemistry, biology, biomaterials, chemical engineering, materials science, bioengineering, or medicine. Please visit our research website (<http://www.mao-lab.com/>) to know more about our research program. Applications including a cover letter and a CV should be e-mailed to nanobio.ok@gmail.com.
